Fine dei risultati

The image shows a virtual world simulation of a police department. In the background, a large screen displays a green waveform and text: "KOPULAVAN BADA, INDONESIA", "11 Mar 2010 04:43:00 +0000", "KOPULAVAN BADA, INDONESIA", "Magnitude: 9.0, 5 km", "KOPULAVAN BADA", "KOPULAVAN BADA", "11 Mar 2010 04:43:00 +0000". In the foreground, two avatars are visible: one labeled "Perting srl Member" and another labeled "ClaudiaGridelli". A text box identifies "Detective J. Wolf (click for help)".

Overlaid on the right is a chat window titled "CONVERSAZIONI". The chat history shows:

- 04:03: Cafeteria: Hello ClaudiaGridelli Resident, welcome
- 04:03: Cafeteria: Hello ClaudiaGridelli Resident, welcome
- 04:06: ClaudiaGridelli: Hello! I am a student of Economics. I need some information about how you manage catastrophic events.

The chat input field contains the text "Chat nei dintorni".

Text on the right side of the image:

- 'nolink>Detective J. Wolf' di Dennis Skute
- Click the 'settings' button to change this what everyone sees when they click me
- You can also add buttons to give item, lo feedback and more.
- The settings button is only visible to the

Seminar in Second Life

27 March : Resilience Management in Second Life

18 May: Resilience management for cultural heritage in Second Life

UNIT - ICT Operative Rooms

The aim of this unit was looking for softwares that are used by the Civil Protection in emergency situations and their suppliers.

This unit was also responsible for seeking information on the subject of **augmented reality**. It is a set of techniques and tools that allow you to add information to the reality you are living in a given time. This is possible thanks to mobile phones, netbooks, and other tools that are evolving over time.

- **ROMAGNA INNOVAZIONE** is an engineering company born in 2008 and based in Forlì. It is specialized in Augmented Reality and promotes scientific research and innovation through technology transfer and applied research, designing and manufacturing innovative, high-performance and cost-competitive products. It also makes plans and find solutions in different areas, from the Information and Communication Technologies (ICT) to environment, from renewable to mechatronics.
- **GLASSUP** is an Italian start-up based in Modena who decided to challenge Google in the market for augmented reality glasses. It has developed a new pair of glasses that, according to the developers, has three advantages:
 - while Google Glass force you to look at the side to visualize information, with GLASSUP you can continue watching in front of you;
 - lower cost (about from 300 €);
 - aesthetic quality.

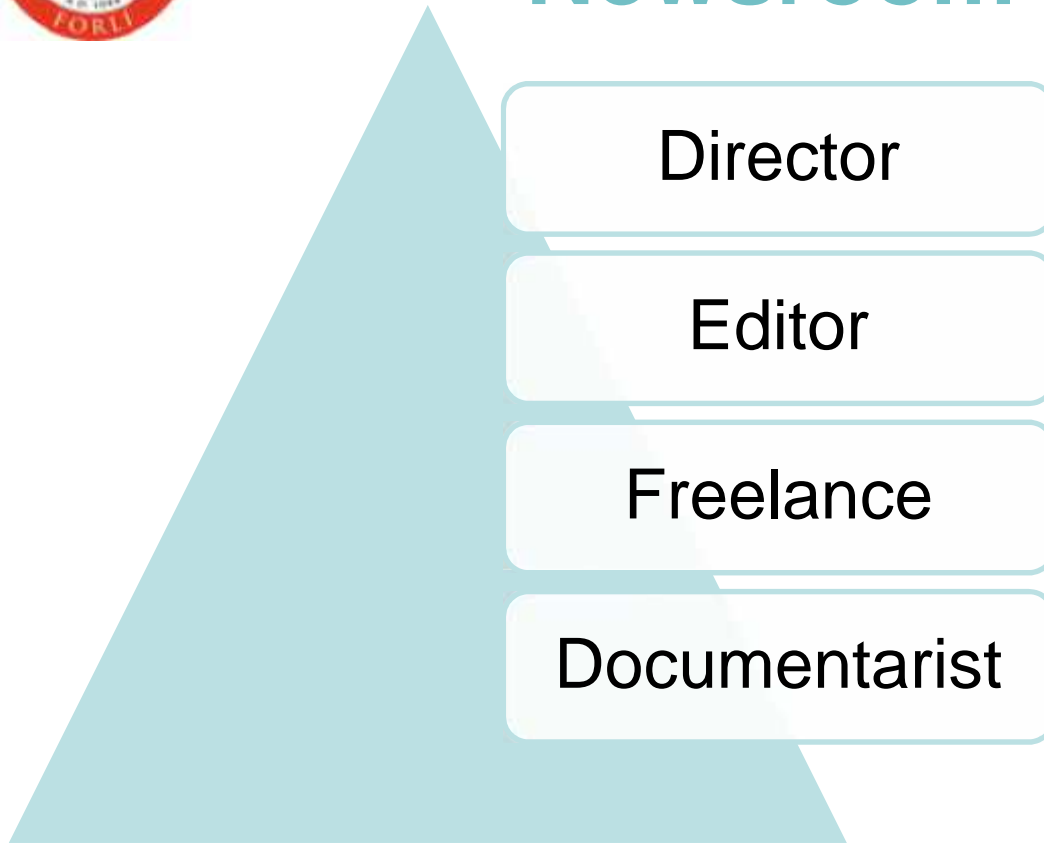

UNIT - Newsroom in Newspaper

The Newsroom is the central place where journalists, reporters, editors, producers and other staff members work together in the development of news to be published in a newspaper or news broadcast on radio or television programs. Some news organizations call the Newsroom “*the city room*”.

Newsroom structure

Steps of journalistic work

Types of sources

- **Direct:** sources that the journalist have to find;
- **Indirect:** sources which organize themselves in order to spread the news.

Softwares

- **Management software (ex: Sonaps):** is used to manage the information collected by journalists;
- **Collection data software (ex: Burli):** works like a search engine that lets you find in the archive elaborated texts or news sent by the Press Agency.

Unit: Disaster Mitigation and Resilience in Cultural Heritage

The aim of this unit is to look how the recovery of cultural heritage is managed after catastrophic events (such as earthquakes, floods and ISIS). Our unit is also responsible for finding information on the use of new technologies in the cultural sphere (smart glasses and smart museum).

List of World Heritage in Danger

<http://whc.unesco.org/en/danger/>

The map shows the countries that according to the Unesco possess risky sites. It should be noted that not all countries and monuments have been included because of the war that are currently at risk.

Innovative Google Glass Technology in the heart of City of Revolution

Google Glass has arrived at Manchester Metropolitan University and in co-operation with the Manchester Art Gallery is carrying out an exciting project to integrate this cutting edge technology into the experience at Manchester Art Gallery. Visitors will explore the art gallery in a completely different

light, receiving augmented information to create a unique experience of cultural heritage. This project will aid Manchester in its aim to become a leading Smart City.

http://www.creativeear.org/?page_id=122

The poster features a blue header with the text "Google Glass AR project with Manchester Art Gallery". Below this is a photograph of the Manchester Art Gallery building. Underneath the photo, the text "Manchester Art Gallery" is displayed. At the bottom, there are four small portrait photos of the project team members, each with their name and role: Dr. Timothy Jiang (Project Leader), Dr. Mandy Jones (Research Assistant), Dr. Paul Lee (Research Assistant), and Felicia Abadi (Google Glass Developer). Logos for Manchester Art Gallery, Manchester City Council, and the University of Manchester are also present.
